

Use Case Flow 1 - Authenticate User

Goal	Authenticate User
Actor	Customer, Bank Employee, Loan Officer, Bank Manager, System Admin, Auditor
Main flow	1. User enters their username and password. 2. System validates the credentials against stored records. 3. System checks the user's role and assigns the matching permissions. 4. System creates a session and redirects the user to their dashboard. 5. Use case ends successfully.
Alternate Flow	Invalid Credentials At Step 2, if authentication fails: 2a. System cannot match the entered credentials to a valid account. a) System displays an error message without indicating whether the username or password was wrong. b) User re-enters credentials. c) After 5 failed attempts, the account is temporarily locked and the user is notified.

Use Case Flow 2 - Deposit / Withdraw Funds

Goal	Deposit / Withdraw Funds
Actor	Customer, Bank Employee
Main flow	1. User selects deposit or withdrawal and enters an amount. 2. System validates the amount against account rules (e.g. sufficient funds for withdrawal). 3. System updates the balance and records the transaction. 4. System shows a confirmation with the new balance. 5. Use case ends successfully.
Alternate Flow	Insufficient Funds At Step 2, if the withdrawal amount exceeds the available balance: 2a. System rejects the withdrawal and shows the current balance. a) User enters a lower amount or cancels.

Use Case Flow 3 - Transfer Money

Goal	Transfer Money
Actor	Customer
Main flow	1. Customer enters the receiver's account number and the amount. 2. System verifies the receiver account exists and the sender has sufficient funds. 3. System debits the sender and credits the receiver in a single transaction. 4. System shows a confirmation to the customer. 5. Use case ends successfully.
Alternate Flow	Transfer Fails Midway At Step 3, if the transfer fails after debiting the sender but before crediting the receiver: 3a. System automatically rolls back the debit. a) System shows an error and logs the failed attempt for review. b) Customer is asked to retry the transfer.

Use Case Flow 4 - Apply for Loan

Goal	Apply for Loan
Actor	Customer (applies), Loan Officer (reviews)
Main flow	1. Customer fills out the loan application form and submits it. 2. System validates the form and generates a reference ID. 3. System places the application in the loan officer's review queue. 4. Loan officer reviews the application and approves or rejects it. 5. System notifies the customer of the decision. 6. Use case ends successfully.
Alternate Flow	Incomplete Application At Step 1, if the customer submits the form with required fields missing: 1a. System highlights the missing fields and blocks submission. a) Customer completes the fields and resubmits.
